

Infrasoft Technologies

Infrasoft Technologies is a software company servicing the banking and finance industry globally, which is headquartered in Mumbai with operations in New York, London, Bahrain, Dubai, Malaysia and more recently, Jersey. Established on-Island to service Jersey's extensive finance industry, Infrasoft is now working, with the support of Jersey Enterprise, to recruit from an excellent seedbed of local IT talent, as part of an in-house training programme.

Kevin Moore, Managing Director, explains, "Jersey Enterprise was able to assist our India-based parent company with the regulatory side of establishing Infrasoft in Jersey, including the acquisition of the necessary staff licences. The team was also able to facilitate introductions with key potential clients.

"One of our cornerstone principles is our understanding that clients like their businesses to be serviced by local individuals, who possess a detailed knowledge of the local practices, regulations and idiosyncrasies of their industry. Jersey Enterprise has helped us to identify potential home-grown talent and, once recruited, students travel to Mumbai for a three month intensive training programme, before returning to Jersey to continue their apprenticeship on-Island. Our clients are delighted with the high calibre of our contractors and we are thrilled to be able to put something back into the Island that has provided Infrasoft with such an excellent business base.

Hanuman Tripathi, CEO and Managing Director, Infrasoft Technologies adds, "We have had a very positive experience establishing our business in Jersey. **Government officials are not only courteous and devoid of red tape but also welcome positive business models that promote trade** and help the society at large. Decisions happen fairly quickly, both at government and trade promotion organisational level."

"We have found operating in Jersey to be extremely obstacle free. We have encountered minimal red-tape and bureaucracy and have found the government to be extremely open to new ideas."

HANUMAN TRIPATHI | CEO AND MANAGING DIRECTOR
